3 Kinematic State Estimation: Filtering and Prediction 147

3.1	Introduction	147
3.2	Least Squares Estimation	148
3.2.1	Linear Least Squares	148
3.2.2	Nonlinear Least Squares Estimation	151
3.2.3	Recursive Least Squares	155
3.2.4	Observability	157
3.3	Kalman Filtering	157
3.3.1	Kalman Filter Definition	158
3.3.2	Correspondence Between Kalman and Fixed-Gain Filters	160
3.3.3	Example of a Two-State Kalman Filter	161
3.3.4	System Driving Noise and Maneuver Model	163
3.4	Extended Kalman Filtering	164
3.5	Example Comparing Nonlinear Estimation Performance	168
3.5.1	Problem and Method Definitions	168
3.5.2	Results	170
3.6	Nonlinear Filtering With Pseudomeasurements	172
3.7	Choice of Tracking Coordinate System	174
3.7.1	Choice of Origin and Axes	174
3.7.2	Cartesian Coordinate Tracking	178
3.7.3	Spherical/Sensor Coordinate Tracking	182
3.7.4	Cartesian Angle-Only Filtering	187

3.8	Filter Simplification	189
3.8.1	State Reduction	189
3.8.2	Filter Decoupling	191
3.9	Conclusions and Future Directions	193
